Could the United States have won the Vietnam War if it had been able to cut off the Viet Cong from their North Vietnamese support by severing the Ho Chi Minh Trail? Acclaimed historian John Prados tackles this crucial question in this elegant, unprecedented, and exciting work of historical scholarship. Aided by recently declassified government documents and previously unavailable oral histories, memoirs, and interviews, Prados explores all sides of the conflict, providing details of the action in Hanoi and North Vietnam and avoiding the narrowly focused battle histories, atomized individual accounts, and overly generalized visions dominating previous histories.
