

Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, how they need it, so that your class time is more engaging and effective. Eric Widmaier (Boston University), Hershel Raff (Medical College of Wisconsin), and Kevin Strang (University of Wisconsin) have taken on the challenge of maintaining the strengths and reputation of Vander's Human Physiology: The Mechanisms of Body Function. Moving beyond the listing of mere facts, it stresses the causal chains of events that constitute the mechanisms of body function. The fundamental purpose of this textbook is to present the principles and facts of human physiology in a format that is suitable for undergraduates regardless of academic background or field of study. Vander's Human Physiology, thirteenth edition, carries on the tradition of clarity and accuracy, while refining and updating the content to meet the needs of today's instructors and students. The thirteenth edition features a streamlined, clinically oriented focus to the study of human body systems. It has also responded to reviewer requests for more clinical applications. Physiology Inquiries are maintained throughout the chapters. These critical-thinking questions associated with figures are just one more opportunity to add to the student's learning experience.

Life on the Edge: The Coming of Age of Quantum Biology, The Liars Key (The Red Queens War Book 2), Second Book of Know How (Usborne Know-how), The Anatomy of Hope: How People Prevail in the Face of Illness, The Montgomery Bus Boycott (Graphic Histories), Atlas conciso de los musculos (Spanish Edition), Diderot Et l'Abbe Barthelemy: Dialogue Philosophique Inedit; (La Priere, Dieu, l'Ame, la Vie Future, Etc;) (Classic Reprint) (French Edition), China Born: Adventures of a Maverick Bookman, The Beast of Boggy Creek: The True Story of the Fouke Monster, Ripley's Game,
