

Alcohol and Your Liver (Incredibly Disgusting Drugs)

Research shows that drug abuse prevention efforts in the preteen years lead directly to lower rates of drug use during the teen years. But middle-school readers are not easily swayed by oversimplified just say no messages. This new series delivers its message in a dramatic and effective way: by telling -- and showing -- readers the harsh realities of the physical effects of drugs, alcohol, and tobacco. Using graphic medical photos and clear, vivid text, this unique series is a hard-hitting and fascinating weapon in the war against teen drug abuse. Teens who read about -- and see -- the foul things that alcohol does to their liver (not to mention the rest of their body) are likely to think a lot longer before deciding to experiment with alcohol.
