

## The Voyages of the MS Rodent (A Little Fiction Book 2)

Why hasn't a mouse ever learned to sail? The question was simple enough, but little did August know the events it would soon set into motion. August and his friends, Beard and Hazel, quickly find themselves at odds with the Mouse Council. When Beard and one of their ships goes missing, August must mount a daring rescue to save him and warn the other mice of a pending invasion of rats! Join August and his friends on this exciting swashbuckling adventure! **A LITTLE FICTION** This series focuses on the traditional family values that build strong character. Each book examines one of these virtues in a fictional setting so that it may be found both instructive and entertaining. These stories are kept intentionally short so that they may be read in a few hours.

**TOLERANCE-** We can be different without forcing others to accept us. While we may not agree with everyone we meet, we can still live together peacefully while standing up for what we believe. Excerpt: August pushed off from shore into the icy water. He wrapped his scarf tightly around his neck and used a long reed to push the boat past the ice burls that floated in the current. It was early on a gray morning. He and his father had left the burrow before anyone else was awake. In the hull they had placed a large knapsack of grain, enough to get him by for several weeks. They also loaded a large soup can that Basil had found for him to use as a burrow out on the island until he could build a proper one. Deftly he guided the boat through the ice flows. A thick fog rose off the surface of the water and became a thick mist which blanketed the shore, hiding his craft from anyone who might be watching. August glanced over his shoulder and smiled as he slowed his pace. Chunks of ice scraped against the side of the boat and the current began to quicken. August would have to work quickly so that he would not miss the island in the fog. As

careful as he was, the island loomed up suddenly out of the mist and he nearly smashed into it. Quick as a wink he darted between two large ice bergs to avoid the collision, then fought his way through an ice jam in search of a safe landing. He circled the island until he spotted the sandbar at the southern tip. He quickly brought the bow around and landed hard up. He pulled the hull free of the water and sat down on the first dry patch he could find to catch his breath. He had done it. He had escaped the reach of the Council. Escaped? Was that the right word? Initially he had thought of it as merely leaving, but the more he thought about the jeers, disappointments, and hurried condemnations, the more he knew he had indeed escaped.
